### SKIN CARE

#### OptiPHI Skin Peel

OptiPHI is a skin care system that has been designed by a biomedical engineering group, which is also involved in the design and manufacture of tissue engineered skin substitutes and high tech wound care products.

Dr Hugo Nel is the plastic surgeon who has special interest in the study of scarless fetal wound healing and tissue engineering of skin substitutes for burn victims. By focusing on his special interest of cell regeneration, came the question: "What would be the best thing to put on your skin?" Hence OptiPHI. It is aimed at creating true skin rejuvenation, through the use of maximum concentration of active ingredients, used in synergy, to allow for POSITIVE HOMEOSTATIC INFLUENCE (PHI, hence OptiPHI), at a cellular level.

Imagine a culture of cells in a TISSUE ENGINEERING LAB. A scientist adds certain HIGH TECH molecules to this culture medium. The culture becomes physiologically younger than expected, due to CELLULAR REJUVENATION. Now imagine your skin as a sophisticated multi-layer cell structure. Now add the same molecules by means of ACTIVES (CELLCEUTICALS). Your skin becomes physiologically younger, due to POSITIVE HOMEOSTATIC INFLUENCE.

Ideally, the OptiPHI skin peel treatment should be done over a 6 week period (1 x per week, for 6 weeks). Each week, the percentage of the 'peel' used is gradually increased. The effect of the Professional treatment can be optimised with the use of the home-care products.

#### OPTIPHI GLYCOLIC ACID SKIN PEEL+ LIPHOHYDROXY ACID SKIN PEEL.

The treatment can also be done as a once-a-week/one-a-month, and can be alternated with any other skin care treatment.

#### TECHNOLOGY / ELECTRICAL MODALITIES

#### BIO-THERAPEUTIC NANO TREATMENT OPTIONS:

While your skin care products act like food for your skin, BT Nano Micro current acts like exercise for your skin. This micro current stimulates the energy part of the skin cell (Mitochondria which produces Adenosine Triphosphate) by 300-500%, thereby encouraging longevity of muscle re-education, improving cellular activity & increasing collagen & elastin production (by 14% & 48% respectively, after 20 days of micro current).

#### BT COCKTAIL LIFT & FIRM TREATMENT (MUSCLE RE-EDUCATION)

- Stand-alone treatment – R380 (45mins)
- Add-on to any skin treatment – R220 (extra 20-30mins)
- BT Specific eye treatment add-on – R 100 (extra 10 mins)
- BT Specific iontophoresis (intense hydration) – R 100 (extra 10 mins)

#### "DR PEN" COLLAGEN INDUCTION SKIN MICRO NEEDLING

Micro channels allow for immediate high tech product penetration.

This 'controlled wounding' then kick starts the body's natural healing / repair process.

The production of collagen + growth factor is increased. Minimum 3 x sessions ; Maximum 10 x sessions 1 month apart, ideally with a skin peel between
